

ISO 19921:2005-10 (E)

Ships and marine technology - Fire resistance of metallic pipe components with resilient and elastomeric seals - Test methods

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Designation	1
4	Test pieces and preparation	2
5	Number of test pieces	2
6	Test bench	2
7	Test performance	2
7.1	Installation of test pieces	2
7.2	Preparation	3
7.3	Measured values and measuring points	3
7.4	Commencement of test	4
7.5	Test temperatures	4
7.6	Test pressures	4
7.7	Test duration	4
7.8	Heat flux	4
8	Assessment	4
9	Test certificate	5
Annex A (normative)	Test certificate	6
Annex B (informative)	Evidence of suitability of other pipeline components via representative nominal bores	7
Annex C (informative)	Pipeline components that can be fire-test qualified using this International Standard	8
