

# DIN 15782:2019-09 (E)

## Media and sound technology - Structured media cabling systems

---

<b>Contents</b>	<b>Page</b>
Foreword .....	4
Introduction .....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions.....	7
4 Planning objectives.....	8
5 Structured cabling in accordance with DIN EN 50173-1 (VDE 0800-173-1).....	10
5.1 General .....	10
5.2 Balanced channels .....	10
5.3 Coaxial channels .....	10
5.4 Channels with optical fibre cabling.....	10
5.5 Channels with hybrid cabling.....	11
5.6 Channels for connecting terminal equipment .....	11
6 Application-specific cabling.....	11
6.1 General .....	11
6.2 XLR 3-pole in accordance with DIN EN 61076-2-103 .....	11
6.3 Connecting hardware in accordance with ANSI E1.11 .....	11
6.3.1 General .....	11
6.3.2 XLR 5-pole connecting hardware .....	12
6.3.3 DIN EN 60603-7 (VDE 0627-603-7) (RJ45) connecting hardware.....	12
6.4 Connecting hardware in accordance with DIN EN 60603-7 (VDE 0627-603-7) (RJ45) .....	13
6.5 BNC connecting hardware in accordance with DIN EN 61169-8.....	13
6.6 LC connecting hardware in accordance with DIN EN 61754-20.....	13
6.7 MPO connecting hardware in accordance with DIN EN 61754-7-1.....	13
6.8 Lens connecting hardware (expanded beam) in accordance with VG 95319-101.....	14
6.9 Modular connecting hardware .....	14
7 Media connection point.....	14
7.1 General .....	14
7.2 Structure .....	14
7.3 Quantity and installation.....	14
8 Transmission processes.....	14
8.1 General .....	14
8.2 Data transmission .....	15
8.3 DMX512-A.....	15
8.4 Video.....	15
8.5 Audio .....	15
9 Documentation and user information.....	15
Annex A (informative) Typical audio/video and data transmission format in copper and optical fibre cables .....	16
Annex B (informative) Applications and transmission services from DIN EN 50173-1 (VDE 0800-173-1):2018-18 .....	19

<b>Annex C (informative) Example of structures for practical use at fixed and mobile venues for this standard .....</b>	<b>21</b>
<b>Bibliography .....</b>	<b>25</b>

## **Figures**

<b>Figure 1 — Sample of topology of structured media cabling .....</b>	<b>9</b>
<b>Figure C.1 — Example of structures for practical use at fixed and mobile venues for this standard: Sound equipment, fixed installation .....</b>	<b>21</b>
<b>Figure C.2 — Example of structures for practical use at fixed and mobile venues for this standard: Lighting equipment, fixed installation .....</b>	<b>22</b>
<b>Figure C.3 — Example of structures for practical use at fixed and mobile venues for this standard: Data technology.....</b>	<b>23</b>
<b>Figure C.4 — Example of structures for practical use at fixed and mobile venues for this standard: Lighting and sound equipment, temporary .....</b>	<b>24</b>

## **Tables**

<b>Table 1 — XLR 3-pole for symmetrical intercom (Beltpack) signals .....</b>	<b>11</b>
<b>Table 2 — XLR 3-pole for dual-channel unsymmetrical intercom (Beltpack) signals.....</b>	<b>11</b>
<b>Table 3 — XLR 5-pole pin assignment.....</b>	<b>12</b>
<b>Table 4 — Pin assignment and colour coding RJ45.....</b>	<b>12</b>
<b>Table A.1 — Typical audio/video and data transmission format in copper and optical fibre cables.....</b>	<b>16</b>
<b>Table B.1 — Excerpt of the most important applications and transmission services from DIN EN 50173-1 (VDE 0800-173-1):2018-10, Table F.1 — Supported ICT and BCT applications for symmetrical copper cabling.....</b>	<b>19</b>
