ISO 6025:2000-11 (E)

Cinematography - Analogue photographic sound test films, 35 mm and 16 mm - Specifications

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Specifications common to all types of photographic sound test films 2

4 Test films for checking and adjusting sound focus and azimuth 2

5 Test films for checking and adjusting the lateral position of the film in relation to the scanning beam (buzz track) 2

6 Test films for checking and adjusting uniformity of the scanning beam illumination (snake track) 4

7 Variable area modulated test films for checking and adjusting sound level 6

8 Test films for checking and adjusting frequency response 7

9 Test films for measuring non-uniformity of film velocity of movement (flutter) 8

Annex A (informative) Azimuth tolerance 9

Annex B (informative) Calculation of photoelectric output factor 10
