

ISO 230-3:2007-08 (E)

Test code for machine tools - Part 3: Determination of thermal effects

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Preliminary remarks	5
4.1	Measuring units	5
4.2	Reference to ISO 230-1	5
4.3	Recommended instrumentation and test equipment	5
4.4	Machine conditions prior to testing	6
4.5	Test sequence	6
4.6	Test environment temperature	6
5	ETVE test	7
5.1	General	7
5.2	Test method	10
5.3	Interpretation of results	11
5.4	Presentation of results	14
6	Thermal distortion caused by rotating spindle	15
6.1	General	15
6.2	Test method	15
6.3	Interpretation of results	17
6.4	Presentation of results	19
7	Thermal distortion caused by linear motion of components	19
7.1	General	19
7.2	Test method	20
7.3	Presentation of results	26
Annex A (informative) Linear displacement sensors		30
Annex B (informative) Guidelines on the required number of linear displacement sensors		35
Annex C (informative) Guidelines for machine tool thermal environment		38
Annex D (informative) Alternative measurement devices and set-ups		40
Bibliography		44
