

Test code for machine tools - Part 8: Determination of vibration levels

Contents		Page
Foreword	v	
Introduction	vi	
1 Scope	1	
2 Normative references	1	
3 Terms and definitions	2	
4 Theoretical background to the dynamic behaviour of machine tools	13	
4.1 Nature of vibration: basic concepts	13	
4.2 Single-degree-of-freedom systems	16	
4.3 Mathematical considerations	20	
4.4 Graphical representations	22	
4.5 Different types of harmonic excitation and response	26	
4.6 More degrees of freedom	33	
4.7 Other miscellaneous types of excitation and response of machine tools	40	
4.8 Spectra, responses and bandwidth	43	
5 Types of vibration and their causes	44	
5.1 Vibrations occurring as a result of unbalance	44	
5.2 Vibrations occurring through the operation of linear slides	48	
5.3 Vibrations occurring externally to the machine	49	
5.4 Vibrations initiated by the machining process: forced vibration and chatter	50	
5.5 Other sources of excitation	52	
6 Practical testing: general concepts	54	
6.1 General	54	
6.2 Measurement of vibration values	54	
6.3 Instrumentation	55	
6.4 Relative and absolute measurements	56	
6.5 Units and parameters	56	
6.6 Uncertainty of measurement	58	
6.7 Note on environmental vibration evaluation	58	
6.8 Type testing	59	
6.9 Location of machine	59	
7 Practical testing: specific applications	60	
7.1 Unbalance	60	
7.2 Machine slide acceleration along its axis (inertial cross-talk)	64	
7.3 Vibrations occurring externally to the machine	67	
7.4 Vibrations occurring through metal cutting	67	
8 Practical testing: structural analysis through artificial excitation	68	
8.1 General	68	
8.2 Spectrum analysis and frequency response testing	69	
8.3 Machine set-up conditions	70	
8.4 Frequency analysis	71	
8.5 Modal analysis	72	
8.6 Cross-response tests	73	
8.7 "Non-standard" vibration modes	74	

8.8	Providing standard stability tests	75
	Annex A (informative) Overview and structure of this part of ISO 230	76
	Annex B (informative) Relationships between vibration parameters	77
	Annex C (informative) Summary of basic vibration theory	79
	Annex D (informative) Spindle and motor balancing protocol	83
	Annex E (informative) Examples of test results and their presentation	84
	Bibliography	93
