ISO 10791-9:2001-03 (E)

Test conditons for machining centres - Part 9: Evaluation of the operating times of tool change and pallet change

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Preliminary remarks 2
4.1 Measuring units 2
4.2 Measuring instruments 2
4.3 Test to be performed 2
4.4 Safeguarding 2

5 Evaluation of the cut-to-cut tool change time (CTC) 2
5.1 Process 2
5.2 Reference position and tool change position 3
5.3 Tool store configurations 4
5.4 Tool store management 4
5.5 Test procedure 4
5.6 Universal heads 6
5.7 Presentation of the results 6

6 Evaluation of the pallet change time (PCT) 7
6.1 Process 7
6.2 Reference position, PR 7
6.3 Pallet store configuration 8
6.4 Pallet store management 9
6.5 Test procedure 11
6.6 Presentation of the results 12

Annex A (informative) Principles on which the test cycles are based 14
