

# ISO 10791-4:1998-07 (E)

## Test conditions for machining centres - Part 4: Accuracy and repeatability of positioning of linear and rotary axes

---

| <b>Contents</b>  | <b>Page</b> |
|--|-------------|
| <b>1</b> Scope .....   | <b>1</b>    |
| <b>2</b> Normative references .....                              | <b>1</b>    |
| <b>3</b> Preliminary remarks .....                               | <b>2</b>    |
| 3.1 Measuring units .....  | 2           |
| 3.2 Reference to ISO 230-2 .....                                 | 2           |
| 3.3 Testing sequence .....                                       | 2           |
| 3.4 Tests to be performed .....                                  | 2           |
| 3.5 Position of linear axes not under test .....                 | 2           |
| <b>4</b> Positioning of linear axes .....                        | <b>2</b>    |
| 4.1 Tolerances .....   | 2           |
| 4.2 Measuring instruments .....                                  | 3           |
| 4.3 Observations and references to ISO 230-1 and ISO 230-2 ..... | 3           |
| 4.4 Calculated deviations .....                                  | 3           |
| <b>5</b> Positioning of rotary axes .....                        | <b>4</b>    |
| 5.1 Tolerances .....   | 4           |
| 5.2 Measuring instruments .....                                  | 5           |
| 5.3 Observations and references to ISO 230-1 and ISO 230-2 ..... | 5           |
| 5.4 Calculated deviations .....                                  | 5           |
| <b>6</b> Information to be recorded .....                        | <b>5</b>    |
| 6.1 Data identifying the machine .....                           | 5           |
| 6.2 Data identifying the test .....                              | 6           |
| 6.3 Data on the test conditions .....                            | 6           |
| <b>Annex A (informative) Bibliography .....</b>                  | <b>7</b>    |
