ISO 16573:2015-04 (E)

Steel - Measurement method for the evaluation of hydrogen embrittlement resistance of high strength steels

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Principle 1

3 Specimen preparation 3

4 Hydrogen charging methods 3
4.1 General 3
4.2 Cathodic charge method 3
4.2.1 Hydrogen charging solution 3
4.2.2 Hydrogen charging conditions 4
4.3 Hydrogen absorption in aqueous solution at free corrosion potential 4
4.4 Hydrogen absorption in atmospheric corrosion environments 4
4.5 Hydrogen absorption in high pressure hydrogen gas 4

5 Preparation of electroplating solution and electroplating condition 5
5.1 General 5
5.2 Electroplating solution 5
5.3 Electroplating conditions 5

6 Constant loading test 5
6.1 Constant loading test procedures 5
6.2 Presentation of the results 6

7 Post-test specimen treatment 8

8 Hydrogen thermal desorption analysis 8
8.1 General 8
8.2 Experimental apparatus (gas chromatograph) 8
8.3 Experimental apparatus (mass spectrometry) 9

9 Test report 9

Bibliography 10
