

# DIN 35224:2018-10 (E)

## Welding for aerospace applications - Acceptance inspection of powder bed based laser beam machines for additive manufacturing

---

| Contents  | Page |
|---|------|
| Foreword .....  | 3    |
| 1 Scope .....   | 4    |
| 2 Normative references .....  | 4    |
| 3 Terms and definitions.....  | 4    |
| 4 Environmental and operational conditions of acceptance inspections.....   | 4    |
| 5 Acceptance inspection .....   | 5    |
| 5.1 General .....   | 5    |
| 5.2 Machine documentation .....   | 5    |
| 5.3 Safety systems .....  | 5    |
| 5.4 Optical system and laser beam test.....                                 | 5    |
| 5.4.1 Testing the laser power.....  | 5    |
| 5.4.2 Testing the laser power stability.....                                | 6    |
| 5.4.3 Testing the laser beam geometry.....                                  | 6    |
| 5.4.4 Testing the focus position.....                                       | 6    |
| 5.4.5 Testing the laser beam position .....                                 | 6    |
| 5.4.6 Additional requirements for machines with multiple beam sources ..... | 6    |
| 5.4.7 Trajectory accuracy.....  | 7    |
| 5.4.8 Scanning speed.....   | 7    |
| 5.5 Mechanical function test.....   | 7    |
| 5.5.1 General .....   | 7    |
| 5.5.2 Working platform.....   | 7    |
| 5.5.3 Dosing table .....  | 7    |
| 5.5.4 Movement of the powder feeding device (recoater movement).....        | 8    |
| 5.6 Purity of the shielding gas atmosphere inside the working space.....    | 8    |
| 5.7 Demonstration parts.....  | 8    |
| 6 Test report.....  | 9    |
| Annex A (informative) Test report.....                                      | 10   |
| Bibliography .....  | 11   |
