ISO/ASTM TR 52952:2023-06 (E)

Additive manufacturing of metals - Feedstock materials - Correlating of rotating drum measurement with powder spreadability in PBF-LB machines

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Designation **2**

5 Methodology **2**

5.1 General principle 2

5.2 Powder selection 3

5.3 Layer homogeneity evaluation 3

5.4 Rotating drum 4

6 Results and discussion **5**

6.1 Spreadability 5

6.2 Rotating drum analysis 7

6.2.1 Experimental protocol 7

6.2.2 Experimental results 7

6.3 Discussion 9

7 Conclusions **10**

8 Additional data **11**

9 Perspectives **12**

Bibliography **13**
