

ISO/ASTM 52939:2023-12 (E)

Additive manufacturing for construction - Qualification principles - Structural and infrastructure elements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Constructability, assessment and review	3
4.1	General	3
4.2	AC feasibility assessment	4
4.3	Validation plan	5
5	Infrastructure of the AC cell	5
6	Qualification of the additive construction process	8
6.1	Quality-relevant process steps within the additive construction process	8
6.2	Data preparation	9
6.3	Requirements for the material management	10
6.4	System related pre-processing	11
6.5	Built process guidance	12
6.6	System (default) post-processing	13
6.7	Process qualification	14
7	Quality assurance	15
7.1	General	15
7.2	Personnel requirements	15
7.3	Documentation and tracing of the process steps	16
7.4	Quality controls	17
7.5	Delivery and logistics	18
	Annex A (informative) Supplementary information	19
	Annex B (informative) Examples for AC quality assurance	28
	Annex C (informative) Examples for quality assurance steps in built process guidance	34
	Annex D (informative) Examples for specific processes	36
	Bibliography	38
