ISO/ASTM 52919:2025-09 (E)

Additive manufacturing - Qualification principles - Test methods for metal casting sand moulds

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Standard practice for sampling specimens of AM-made sand moulds 1
4.1 Factors causing uneven properties in an AM-made sand mould 1
4.2 Sampling specimens of an AM-made sand mould 2

5 Test methods applicable to evaluating an AM-made sand mould 2
5.1 General 2
5.2 Requirements for sampling test specimens of an AM-made sand mould 2
5.3 Applicable test methods 3
5.3.1 General 3
5.3.2 Tensile strength test 3
5.3.3 Bending/transverse strength test 4
5.3.4 Gas permeability test 4
5.3.5 Thermal expansion test 4

6 Documentation 5
6.1 General 5
6.2 Purchasing an AM-made sand mould 5
6.3 Verifying AM machine performance 5

Annex A (normative) Identifier and orientation index of a specimen 7

Annex B (informative) Example of sampling test specimens and reporting table 8
