

# ISO/ASTM 52919:2025-09 (E)

## Additive manufacturing - Qualification principles - Test methods for metal casting sand moulds

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Standard practice for sampling specimens of AM-made sand moulds .....	1
4.1	Factors causing uneven properties in an AM-made sand mould .....	1
4.2	Sampling specimens of an AM-made sand mould .....	2
5	Test methods applicable to evaluating an AM-made sand mould .....	2
5.1	General .....	2
5.2	Requirements for sampling test specimens of an AM-made sand mould .....	2
5.3	Applicable test methods .....	3
5.3.1	General .....	3
5.3.2	Tensile strength test .....	3
5.3.3	Bending/transverse strength test .....	4
5.3.4	Gas permeability test .....	4
5.3.5	Thermal expansion test .....	4
6	Documentation .....	5
6.1	General .....	5
6.2	Purchasing an AM-made sand mould .....	5
6.3	Verifying AM machine performance .....	5
Annex A (normative) Identifier and orientation index of a specimen .....		7
Annex B (informative) Example of sampling test specimens and reporting table .....		8
Bibliography .....		13
