DIN EN ISO/ASTM 52929:2026-04 (E)

Additive manufacturing of metals - Powder bed fusion - Presentation of material properties in material data sheets (ISO/ASTM 52929:2025)

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Abbreviations ... **1**

5 Material properties to be displayed ... **2**

6 Optional material properties to be displayed ... **2**

7 Boundary conditions for the determination of material properties ... **3**
7.1 General ... 3
7.2 Applied PBF machine(s) ... 3
7.3 Applied feedstock ... 3
7.4 Applied process parameters ... 4
7.5 Applied shielding gas ... 4
7.6 Applied powder spreading device ... 4
7.7 Post-processing applied ... 4

8 Material property testing ... **5**
8.1 General ... 5
8.2 Tensile testing ... 5
8.3 Hardness testing ... 6
8.4 Density testing ... 6

9 Generating and handling test data ... **6**
9.1 Number of specimens and build jobs ... 6
9.2 Combination of data ... 7

10 Reporting of characteristic values ... **8**

Annex A (informative) **Example of a material data sheet** ... **10**

Bibliography ... **14**
