DIN SPEC 35220:2015-11 (E)

Adaption to climate change - Projections on climate change and ways for handling uncertainties

Contents

Page

Foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Terms and definitions ... 5

3 Basis for the planning and implementation of adaptation measures ... 9

4 Reasons for uncertainties and measures to limit them ... 10
4.1 Ensemble modelling ... 10
4.2 Definition of the evaluation criteria ... 11
4.3 Climate monitoring ... 11
4.4 Further measures ... 11

5 Advice on the planning and implementation of measures ... 12
5.1 Social agreement about protection targets and measures ... 12
5.2 Scenario technique for risk management ... 13
5.3 Incremental implementation of the necessary protective measures ... 13

6 Interfaces with operational emergency planning and catastrophe precautions ... 14

Annex A (informative) **Short checklist on relevance for standards committees** ... 15
A.1 Background ... 15
A.2 What does adaptation to climate change mean? ... 15
A.3 Checklist for standards committees ... 15

Annex B (informative) **Sources of climate-relevant data** ... 17

Bibliography ... 18
