DIN SPEC 4868:2020-11 (E)

Sports Textiles - Measurement of Compression and Material Properties (Pressure Properties); Text in English

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Requirements 8
4.1 Measuring points 8
4.1.1 Leg 8
4.1.2 Torso 10
4.1.3 Arm 11
4.2 Measurement results 12
4.2.1 Compression 12
4.2.2 Compression categories 12
4.2.3 Pressure profiles and pressure characteristics 13
4.3 Test specifications 13
4.3.1 Measurement at minimum and maximum circumference 13
4.3.2 Pretreatment 14
4.3.3 Determination of measuring points 14
4.3.4 Marking the test samples 14
4.4 Compression measurement 14
4.4.1 Measuring principle 14
4.4.2 Test device 14
4.4.3 Test preparation 14
4.4.4 Compression measurement at test size 15
4.4.5 Stiffness measurement 15
4.4.6 Material fatigue over time. 15
4.4.7 Wear-out effect 15
4.4.8 Results 15
4.5 Calculations 15
4.5.1 Practical elongation 15
4.5.2 Force 16
4.5.3 Compression 16
4.5.4 Residual pressure ratio 16
4.5.5 Stiffness 16
4.5.6 Wear-out effect 17

Annex A (informative) Testing processes 18
A.1 General 18
A.2 Compression test 18
A.3 Stiffness test 19
A.4 Combination compression — stiffness test 19

Annex B (informative) Schematic Pressure profiles 21

Annex C (informative) Pressure Profiles — practical examples 22
C.1 General 22
C.2 Legwear — running pants 22

C.3 Legwear — calf sleeve, example 1 24
C.4 Legwear — calf sleeve, example 2 26
C.5 Armwear — arm sleeve 28
C.6 Body wear — top 30

Bibliography 32
