DIN SPEC 91434:2021-05 (E)

Agri-photovoltaic systems - Requirements for primary agricultural use

Content

Page

Foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Categorization of agrivoltaic systems 9

5 Criteria and requirements for the main agricultural use 13
5.1 Agricultural usability of the area 13
5.2 Requirements for the agricultural cultivation proposal 13
5.2.1 General 13
5.2.2 Installation 14
5.2.3 Land loss 14
5.2.4 Tillage workability 14
5.2.5 Light availability and homogeneity 14
5.2.6 Water availability 14
5.2.7 Soil erosion and silting of the topsoil 14
5.2.8 Residue-free assembly and disassembly 15
5.2.9 Calculation of economic efficiency 15
5.2.10 Land use efficiency 15
5.2.11 Determination of the reference yield 15
5.2.12 Determination of the yield reduction of the crops grown on the total project area 15

6 Planning and technical requirements for agrivoltaic systems 15
6.1 Light availability and homogeneity 15
6.2 Requirements for the supporting structure and the stability of the installation 15
6.3 Requirements for PV module technology 16
6.4 Requirements for the installation 16
6.4.1 General 16
6.4.2 Dimensions for high-mounted systems 16
6.4.3 Dimensions for ground level systems 16
6.4.4 Module rows 16
6.4.5 Protection of the main supporting structure of the agrivoltaic systems against mechanical damage 16
6.5 Requirements for further BOS components 17

7 Requirements for installation, operation and maintenance 17
7.1 Installation requirements specific to agrivoltaics 17
7.2 Acceptance and commissioning of agrivoltaic system 17
7.3 Requirements for the operation and maintenance of agrivoltaic systems 18
7.3.1 General 18
7.3.2 Cleaning requirements 18

Annex A (normative) **Form for an agricultural cultivation proposal** 19
