

DIN SPEC 91436:2021-05 (E)

Reference model for operational waste and recyclables management oriented towards a vision of "zero waste"

Contents		Page
Foreword		3
Introduction		4
1 Scope		6
2 Normative references		6
3 Terms and definitions		6
4 Abbreviated terms		11
5 The "zero waste" vision		12
6 Establishing system boundaries		12
7 Analysis of the operational environment		12
8 Definition of the set of goals		13
9 Roles and responsibilities		14
10 Communication		16
11 Setting up a training concept		16
12 Waste and recyclables management processes		17
12.1 General		17
12.2 Prevention		18
12.3 Collection and sorting		19
12.4 Container concept		19
12.5 Reuse		20
12.6 Recycling		20
12.7 Composting		21
12.8 Fermentation		21
12.9 Thermal or energy recovery and landfilling		22
13 Review		22
14 Key figures, monitoring and reporting		23
15 Continual improvement		24
Annex A (normative) Applicable documents and explanatory information		25
A.1 General		25
A.2 Master data for the checklists		25
A.3 Checklist A		26
A.4 Checklist B		30
A.5 Checklist C		31
A.6 Classification of hazardous waste		31

A.7	Technical impossibility and economic infeasibility	32
	Annex B (informative) Waste prevention plan and further recommendations for action	33
B.1	General	33
B.2	Waste prevention plan	33
B.3	Further recommendations for action	34
	Bibliography	38
	Figures Figure 1 -- Areas of application of the reference model	18
