DIN SPEC 91373-2:2021-11 (E)

Magnetocalorics - Part 2: Measurement of magnetocaloric properties; Text in English

Contents

Page

Foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 5

4 Sample properties ... 5

5 Isothermal entropy change Δs (M, T, H) ... 6
5.1 Introduction ... 6
5.2 Brief summary of procedure ... 6
5.3 Devices ... 6
5.4 Measurement ... 7
5.5 Calculation of Δs_T ... 10

6 Isothermal entropy change Δs (measured by DSC) ... 11
6.1 Measurement ... 11
6.2 Calculations of Δs_T ... 12

7 Adiabatic temperature change ΔT_{ad} ... 13
7.1 Introduction ... 13
7.2 Brief summary of procedure ... 13
7.3 Devices ... 14
7.4 Measurement ... 14

Bibliography ... 18

Figures

Figure 1 — Scheme for the determination of boundary temperatures for a phase reset during isofield MH measurements ... 10

Figure 2 — Exemplary temperature-dependent heat capacity measurement for a second-order phase transition with and without an externally applied magnetic field ... 12

Figure 3 — Temperature-dependent specific entropy calculated from heat capacity measurements (see Figure 2) for a second-order phase transition with and without an externally applied magnetic field ... 12

Figure 4 — Exemplary adiabatic temperature change measurements for a second-order phase transition a) as well as for a conventional b) and inverse c) first-order phase transition ... 16
