

DIN SAE SPEC 91487:2025-08 (E)

Terms, definitions and characteristics for the use of Digital Twins of electric vehicle batteries; Text in English

Contents

	Page
Foreword	4
1 Scope.....	5
2 Normative references	5
3 Terms and definitions.....	5
4 What is a Digital Twin	8
4.1 Digital Twin (DT).....	8
4.2 Digital Twin Levels.....	9
5 Battery Digital Twin for Electric Vehicles	11
5.1 Battery Digital Twin (BDT)	11
5.2 Business Context and Goals.....	12
6 Digital Twin framework.....	13
6.1 Level-1 (Descriptive Battery Digital Twin)	13
6.1.1 Capabilities.....	13
6.1.2 Use Cases	14
6.1.3 Attributes	15
6.1.4 Architectural Building Blocks	17
6.2 Level-2 (Informative Battery Digital Twin)	19
6.2.1 Capabilities.....	19
6.2.2 Use Cases	20
6.2.3 Attributes	21
6.2.4 Architectural Building Blocks	22
6.3 Level-3 (Predictive Battery Digital Twin)	25
6.3.1 Capabilities.....	25
6.3.2 Use Cases	26
6.3.3 Attributes	27
6.3.4 Architectural Building Blocks	27
6.4 Level-4 (Living Battery Digital Twin)	29
6.4.1 Capability	29
6.4.2 Use Cases	30
6.4.3 Attributes	30
6.4.4 Architectural Building Blocks	30
7 IT Implementation Considerations	32
7.1 General.....	32
7.2 Scalable Compute Infrastructure	32
7.3 Data Architecture and Pipeline.....	32
7.4 Model Management, Deployment and Orchestration.....	33
7.5 Cybersecurity.....	33
7.6 Application Security	33
7.7 Access Control	33
7.8 Data Security.....	34
7.9 Regulatory and Compliance	34
Bibliography.....	35

Figures

Figure 1 — Business outcome through the Digital Twin within a connected world 9

Figure 2 — Attributes of the Operational Digital Twin..... 11

Figure 3 — Architectural Building Blocks of a Level-1 Battery Digital Twin..... 17

Figure 4 — Architectural Building Blocks of a Level-1 Battery Digital Twin — Visualization..... 19

Figure 5 — Architectural Building Blocks of a Level-2 Battery Digital Twin..... 23

Figure 6 — Exemplary visualization of a Level-2 BDT 25

Figure 7 — Exemplary visualization of architectural building blocks of a Level-3 BDT 28

Figure 8 — Exemplary visualization of a Level-3 BDT Dashboard..... 29

Figure 9 — Exemplary building blocks of a Level-4 BDT 31

Figure 10 — Exemplary visualization of a model training process 32

Tables

Table 1 — Description of Digital Twin Levels..... 10

Table 2 — Description of Use Cases 12

Table 3 — Capabilities of a Level-1 Battery Digital Twin..... 13

Table 4 — Description of Use Cases for Level-1 14

Table 5 — Attributes for constructing a Level-1 Digital Battery Twin 15

Table 6 — Capabilities of a Level-2 Battery Digital Twin..... 19

Table 7 — Description of Use Cases for Level-2 21

Table 8 — Attributes for constructing a Level-2 Digital Battery Twin 21

Table 9 — Capabilities of a Level-3 Battery Digital Twin..... 25

Table 10 — Description of Use Cases for Level-3 27

Table 11 — Capabilities of a Level-4 Battery Digital Twin 29
