

DIN SPEC 91520:2025-09 (E)

Interface between quantum computer backends and software frameworks; Text in English

| Contents | Page |
|---|------|
| Foreword | 4 |
| Introduction | 6 |
| 1 Scope | 7 |
| 2 Normative references | 7 |
| 3 Terms and definitions | 7 |
| 3.1 Software background | 7 |
| 3.2 Quantum Physics Background | 9 |
| 3.3 Quantum Information | 12 |
| 3.4 Quantum processing | 14 |
| 3.5 Quantum Software | 19 |
| 4 Symbols and abbreviations | 20 |
| 5 Requirements for the Interface between Quantum Computing Backends and Software Frameworks | 20 |
| 5.1 General Requirements for the Interface | 20 |
| 5.2 Job-specific data for the Interface | 21 |
| 5.3 Device-specific data for the Interface | 23 |
| 5.4 Requirements for the Network Interface | 24 |
| 5.4.1 General Aspects for the Network Interface | 24 |
| 5.4.2 Security Requirements for Network Interface | 25 |
| 5.5 Transmitting Quantum Programs | 25 |
| 5.5.1 Requirements for the Quantum Programs | 25 |
| 5.5.2 Level/Abstraction of Quantum Programs/Quantum Circuits | 25 |
| 5.5.3 Parameterized Quantum Circuits | 27 |
| 6 Requirements for the Hardware Backend | 27 |
| 6.1 Overview of the Generic Quantum Computer Backend Architecture | 27 |
| 6.2 Classical hardware for quantum | 28 |
| 6.3 Information from Backend/Backend Provider | 30 |
| 7 Requirements for the Software-Framework | 31 |
| 7.1 Necessary Information from Software Framework/User | 31 |
| 7.2 Compiling Quantum Circuits | 31 |
| Annex A (informative) Hardware Platforms | 33 |
| A.1 DiVincenzo Criteria for the physical quantum system | 33 |
| A.2 Classical Control Unit | 34 |
| A.3 Example Hardware Platforms | 34 |
| A.3.1 Introduction | 34 |
| A.3.2 Ion traps | 34 |
| A.3.3 Superconducting | 35 |
| A.3.4 Neutral Atoms | 35 |
| A.3.5 Spin Qubits | 35 |
| A.3.6 NV-Centres | 36 |
| A.3.7 Photonic Platforms | 36 |
| Annex B (informative) Example Interface based on REST API | 37 |
| B.1 Example 1: Qunicorn Interface | 37 |
| B.2 Example 2: Quantum Device Management Interface | 39 |
| Bibliography | 40 |

Figures

| | |
|--|----|
| Figure 1 — Exemplary depiction of the support of hybrid algorithms within a software stack with the preferred architecture in the lower half | 27 |
| Figure 2 — Abstract depiction of a quantum computing backend | 28 |

Tables

| | |
|--|----|
| Table 1 — Key Aspects of the Interface Specification | 21 |
