ISO 18413:2002-10 (E)

Hydraulic fluid power - Cleanliness of parts and components - Inspection document and principles related to contaminant collection, analysis and data reporting

Contents

Page

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Inspection document principles 3

5 Contaminant collection principles 4

6 Contaminant analysis principles 6

7 Data reporting principles 7

8 Selection guidelines 8

9 Criterion for acceptance 8

10 Identification statement (reference of this International Standard) 8

Annexes A Contaminant collection principles -- Agitation method 11

B Contaminant collection principles -- Pressure rinse method 13

C Contaminant collection principles -- Ultrasonic vibration method 16

D Contaminant collection principles -- End use simulation 18

E Contaminant analysis and data reporting principles 21

F Test stand for end use simulation -- Design guidelines 23

G Equivalent spherical area of complex enclosed surfaces 26
