

IEC 88528-11:2004-03 (E)

Reciprocating internal combustion engine driven alternating current generating sets_- Part_11: Rotary uninterruptible power systems_- Performance requirements and test methods

CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	8
3.1 General	8
3.2 Performance of systems and components	9
3.3 Specified values	10
3.4 Input values.....	11
3.5 Output values	12
4 Symbols and abbreviations	12
5 Selection criteria	12
6 General description	13
6.1 Rotary UPS	13
6.2 Types of rotary UPS	13
6.2.1 Series connected rotary UPS.....	13
6.2.2 Line interactive rotary UPS	14
6.3 Parallel operation of a rotary UPS installation.....	15
6.3.1 General	15
6.3.2 Parallel operation	15
6.3.3 Redundant operation	15
6.4 Power system changeover with rotary UPS installations (bypass).....	16
6.5 Enclosure protection.....	16
7 Modes of operation.....	16
7.1 Power conditioning mode	17
7.2 Independent mode.....	17
7.3 Bypass mode	18
7.4 Off mode	18
7.5 Transitions	18
7.5.1 Transition 1, starting the system with mains voltage present.....	18
7.5.2 Transition 2, start-up without mains voltage (black start)	18
7.5.3 Transition 3, disconnect from grid.....	19
7.5.4 Transition 4, connect to grid	19
7.5.5 Transition 6, transfer	19
7.5.6 Transition 7, 8, retransfer	19
8 Service conditions	19
8.1 Normal service conditions	19
8.2 Operation at extended ambient.....	19
8.2.1 Ambient service temperature	19
8.2.2 Ambient storage and transportation conditions	19
8.3 Engines.....	20
8.4 Rotating electrical machines.....	20
8.5 Control logic.....	20

9	Electrical service conditions and performance	20
9.1	General – all rotary UPS.....	20
9.2	Performance.....	21
10	Manufacturer technical declarations	22
10.1	General.....	22
10.2	Purchaser specification guidelines.....	22
10.2.1	Type of rotary UPS, additional features, and system requirements	23
10.2.2	Rotary UPS input.....	23
10.2.3	Load to be supplied from a rotary UPS	23
10.2.4	Rotary UPS output.....	24
10.2.5	Battery (where applicable).....	24
10.2.6	General application requirements and special service conditions.....	25
10.2.7	Multi-module system configurations	25
10.2.8	Electromagnetic compatibility	26
11	Testing	27
11.1	Static output voltage and frequency deviations.....	27
11.2	Dynamic output voltage and frequency deviations	28
11.3	Input current characteristics	28
11.4	Measurement of filter properties	28
11.4.1	From mains to output.....	28
11.4.2	From output to mains.....	30
11.5	System performance	30
11.5.1	Efficiency.....	30
11.5.2	Stored energy times	30
11.5.3	Multi-module rotary UPS performance	30
11.6	Black start test	31
11.7	Environmental tests.....	31
11.8	Audible noise	31
11.9	Testing.....	31
12	Maintenance and product marking	33
12.1	Nameplate markings.....	33
12.2	Label requirements.....	34
12.3	Name plate marker	34
12.4	Decals – labelling	35
12.4.1	Safety instructions and documentation	35
12.5	Maintenance.....	35
	Annex A (informative) Typical energy storage devices	36
	Annex B (normative) Reference non-linear load – Single-phase.....	40
	Annex C (normative) Reference non-linear load – Three-phase	42
	Annex D (normative) Input mains failure – Test method	43
	Annex E (informative) Types of uninterruptible power systems (UPS) configurations	44
	Figure 1 – Types of UPS systems	13
	Figure 2 – Typical example series connected rotary UPS.....	13
	Figure 3 – Typical example of a line interactive rotary UPS.....	14
	Figure 4 – Parallel operation of a rotary UPS	15

Figure 5 – Bypass operation	16
Figure 6 – Illustration of rotary UPS operation	17
Figure 7 – Operating modes.....	18
Figure 8 – Surge test	29
Figure 9 – Warning label.....	34
Figure A.1 – Dual conversion – direct-coupled flywheel	37
Figure A.2 – Line interactive – direct-coupled flywheel.....	37
Figure A.3 – Dual conversion – indirect coupled flywheel.....	37
Figure A.4 – Line interactive – indirect coupled flywheel	38
Figure A.5 – Double fed a.c. machine	38
Figure A.6 – Dual conversion with battery.....	38
Figure A.7 – Line interactive with battery	39
Figure B.1 – Single-phase non-linear load	40
Figure C.1 – Three-phase non-linear load	42
Figure D.1 – Input mains failure test method.....	43
Figure E.1 – Series connected type 1	44
Figure E.2 – Series connected type 2	45
Figure E.3 – Line interactive	45
Figure E.4 – Typical UPS.....	46
Figure E.5 – Typical switchless dual feed UPS	47
Table 1 – Compatibility levels for individual harmonic voltages in mains power.....	21
Table 2 – Operating steady-state limit values for performance classes	21
Table 3 – Operating dynamic limit values for performance classes (note 1).....	22
Table 4 – Technical data sheets – Manufacturers declaration	26
Table 5 – Test methods for rotary UPS performance characteristics	32
