DIN EN 1670:2007-06 (E)

Building hardware - Corrosion resistance - Requirements and test methods

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Classification 6

5 Requirements 6
5.1 General 6
5.2 General test requirements 6
5.3 Functional acceptance condition 7
5.4 Appearance acceptance condition 7
5.4.1 General 7
5.4.2 Degree of rust 7
5.4.3 Degree of blistering 7

6 Test conditions 7
6.1 General conditions 7
6.2 Treatment following the corrosion test 8

7 Marking 8

Annex A (informative) Examples of service conditions for which the various grades of corrosion resistance are appropriate 9
