Music

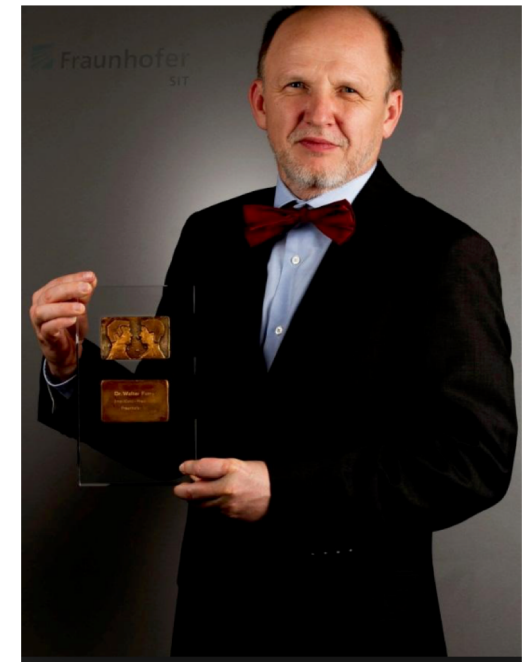

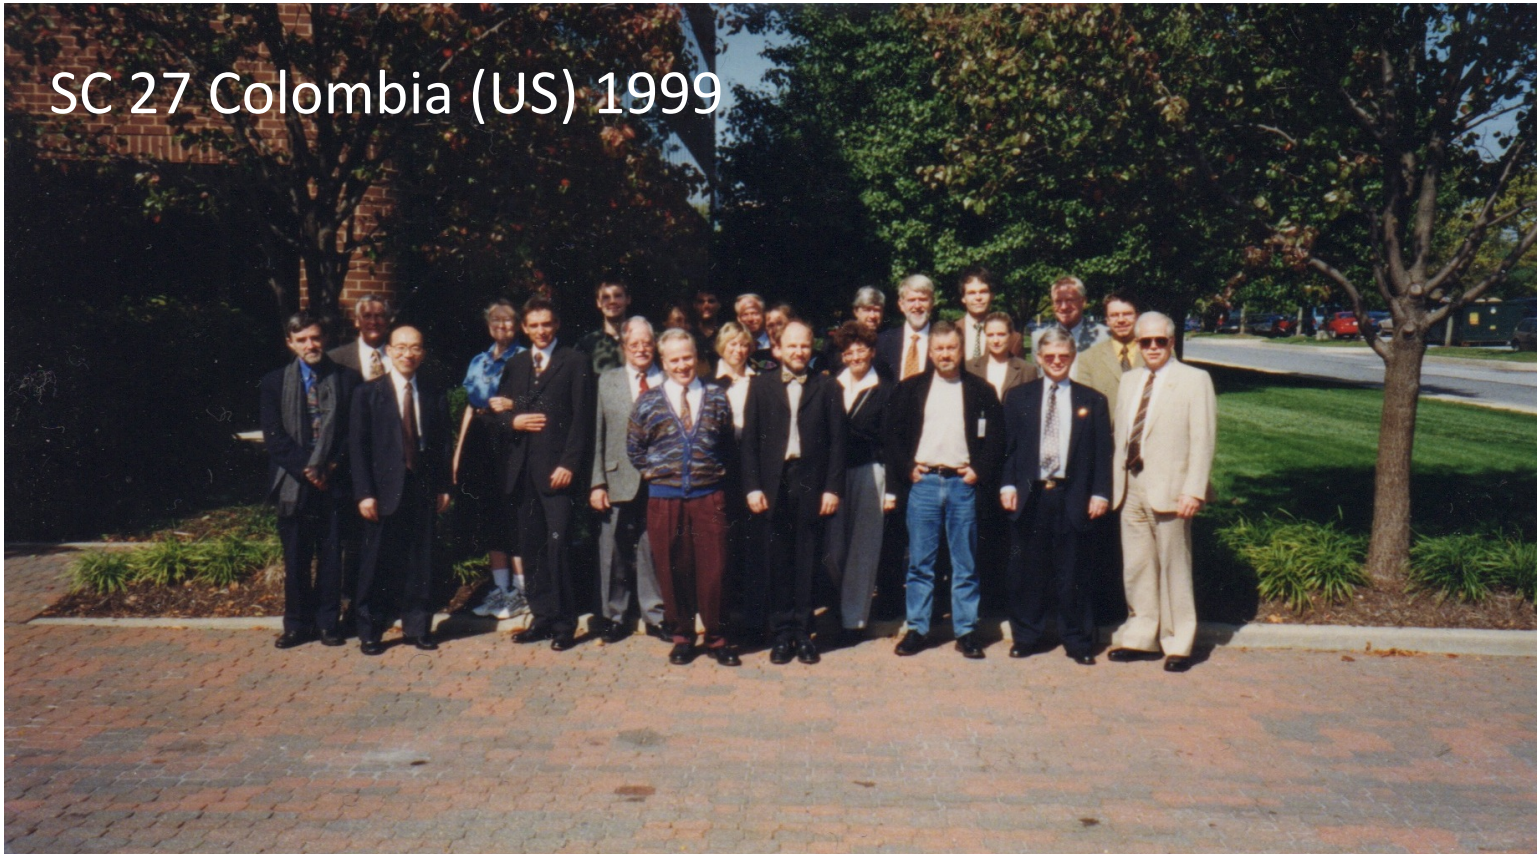

Life Without
Music
Would *B^b*

A graphic design featuring the text 'Life Without Music Would B^b'. The word 'Music' is in a large, bold, italicized serif font. Below it, 'Would' is in a smaller serif font, followed by a large 'B' with a flat symbol. To the left of the 'B' is a musical staff with a treble clef, a quarter note, an eighth note, and a whole note.

Greetings from Friends

Walter --

What I remember best is your seemingly effortless management style in managing SC 27.

All the best to you as you begin the next adventures of your life and career.

Hopefully you will find more time to enjoy the fruits of your labors — I certainly do.

-- **Dan Benigni** (former US HoD)

Greetings from Friends

Walter is indeed a true professional in his capacity as chair for SC 27. He is respectful to the code of standardization and has a genuine and deep interest and understanding of the field of security, as well as the people involved in the process. Today's size and status of SC 27 is to say the least impressive and as Walter might have put it: The numbers speaks for itself.

Bengt Rydstedt

Former Swedish Head of Delegation to SC 27
Secretary, ISO/TC 292 Security and resilience

Greetings from Friends

Walter my congratulations for a job very well done, I hope you will enjoy retirement, and I hope that your Eagle is in good health and happy, and just to let you know that Chimo is hale and hearty.

John Hopkinson (former Canadian HoD)

Greetings from Friends

My first meeting with Walter was in Ottawa, in October 1994, at my first SC 27 meeting. We were introduced to each other as both being mathematicians – a great start! For some time, our paths did not cross so much (being in WG 2 and WG 1), then Walter became our chairman; and soon being challenged with an interesting vote at a special meeting in Tokyo, about what evolved to be now ISO/IEC 27002. At that time, not everybody was as convinced about information security management systems as they are now, and we had a beautiful vote: 14 vs. 13. A dream scenario for any chairman! Walter managed this difficult situation in such a great way, and in the end, after some discussing years, the committee found its way together again. This is only one of the many achievements Walter accomplished!

In the more recent days, we became personal friends, and I always enjoy his views of the world, his humour, the super-perfect sound system , and the wonderful evenings we share!

All the very best for your future,

Angelika Eksteen (former editor of 27001, 27002, 27006 etc.)

Greetings from Friends

I would like to join others in congratulating and thanking Walter for his contributions to SC27 and the information security industry. Walter's contribution goes back to the beginning of SC27, first as an expert and more recently as chair. Walter has been part of guiding and leading SC 27's role in taking information security from a niche specialist discipline to a topic of mainstream importance in our world. With his experience and perspective, you'd have to get up pretty early in the morning to put one over on Walter. It has been my privilege to know Walter as a friend and wise mentor for more years than I like to count. I wish him well in what comes next in his life.

John Snare (former HoD Australia)
