

Auslegungen zu DIN EN 1090-2:2018-09**„Ausführung von Stahltragwerken und Aluminiumtragwerken - Teil 2: Technische Regeln für die Ausführung von Stahltragwerken“**

Abschnitt	Absatz	Frage-Nr.	Frage	Auslegung	Datum
			Which tolerances are applicable in case there is nothing said in the contract?	<p>Essential tolerances are always applicable. Functional tolerances are also always applicable unless different values according to Clause 11.3.3 are specified between contractors. The obligation to fulfill the functional tolerances or the alternative values according 11.3.3 results from Clause 11.3.1 in DIN EN 1090-2:2018-09.</p> <p>The EN 1090-2 standard is a structural steel specification for use in the manufacture of structural steel products. Therefore, it is necessary to define the specifications and the limit values for the steel construction products in relation to the execution classes (EXC1-EXC4).</p>	2021-08
