Organization : UNE
Country : Spain **Latest Date for Comments :** 2023-01-21
Draft for public
enquiry
Project ID : P0054992/0001
ICS :
National Ref : PNE 103809
Title : Dynamic probing type Borro.
Scope : The purpose of this standard is to describe the procedure for carrying out the so-called Borro-type dynamic penetration test. This test determines the resistance of the ground to the penetration of a point when it is struck according to the established procedure. Its use makes it possible, among other things, to
 -Determine the dynamic penetration resistance of a soil.
 -To evaluate the compactness of a soil, preferably granular.
 -To investigate the homogeneity and certain irregularities of a soil layer.

National : REV/AMD UNE 103809:2010

** End of Subsector **

Subsector B17: LIGHTING EQUIPMENT AND LIGHTING APPLICATION TECHNOLOGY

Subsector : B17 **Registration Date :** 2022-12-22

Organization : UNI
Country : Italy
Project ID : 01611660/0001 Project
Established
ICS : 17.180.20
National Ref : UNI1611660
Title : Methodologies for validating results from lighting calculation programs
Scope : This document defines a set of general models for the calculation of the basic parameters on which deviations between data processed by a computer system for lighting design and data derived from analytical calculation applied to the same model are evaluated, providing the maximum acceptable tolerances and defining congruence between the results provided by the software and the analytical ones. The lighting parameters considered are: illuminance, Luminance, Glare, Uniformity and gradients, Scattered luminous flux, Daylight. The technical specification does not address the quality and evaluation requirements for software products in the UNI CEI ISO IEC 25012 standard. The technical specification does not define the activities necessary to analyze evaluation requirements, specify, design, and perform evaluation actions of software products already covered by UNI ISO IEC 14598-5.

** End of Subsector **

Subsector B19: CERAMIC TILES

Subsector : B19 Registration Date : 2022-12-12
Organization : UNE
Country : Spain Latest Date for Comments : 2023-01-21
Project ID : P0057795/0001 Draft for public
enquiry
ICS :
National Ref : PNE 138002
Title : General rules for the installation of ceramic tiles with bonding materials.
Scope : This standard defines the quality of ceramic tile coverings and aims to establish the general rules and associated processes for the design, selection of materials, preparation, installation, delivery and maintenance in use of ceramic systems that must be considered in order to guarantee their quality and durability, as well as their technical and aesthetic performance.
 The scope of application of this standard is established in general for all types of ceramic tile cladding (in all its variants), installed by direct adhesion using bonding materials and on all types of substrates suitable for receiving such cladding.
 The standard includes the tile installation rules for the following types of bonding materials:
 - Adhesives complying with the requirements of Standard UNE-EN 12004-1, including those referred to in Annex ZA of that standard.
 - Mortars for the fixing of wall tilings with ceramic tiles, with the limitations established in this standard.
 Excluded from the scope of application of this standard are other coverings made with ceramic tiles, but installed by other mechanical and/or chemical anchoring systems, in which the adhesion materials indicated in the previous paragraph do not intervene, as in the case of ventilated façades or raised technical flooring.

** End of Subsector **

Subsector B25: GAS DISTRIBUTION INSTALLATION AND RELATED EQUIPMENT

Subsector : B25 **Registration Date :** 2022-12-22
Organization : UNI
Country : Italy

Project ID : 01611940/0001 **Project Established**

ICS : 91.140.10
National Ref : UNI1611940
Title : Gas fired instantaneous water heaters for the production of domestic hot water - Specific requirements for water heaters that use combustible gas of the H and the E groups at the pressures stated in EN 437 and, in addition, use gases with hydrogen blends up to 20% Hydrogen volume in the gas

Scope : This Technical specification specifies additional requirements and supplementary tests for Gas-fired instantaneous water heaters for the production of domestic hot water using gas of the H and E groups and, in addition, use gases with hydrogen blends up to 20% Hydrogen volume in the gas.
 It defines a conformity assessment procedure for such appliances in order to fulfil Legislation in force.
 It should be used in conjunction with EN 26.

Title : Sintered metal materials for bearings. Specifications.
Scope : This standard specifies the composition, microstructure, physical properties and mechanical properties required for sintered materials to be used in plain bearings. The information provided by this standard is generally sufficient for most current uses. However, in special cases the manufacturer and the user can establish by agreement new specifications, which are not subject to this standard.
